

More TV. Less Money.

IPTV - 10,000+ HD Premium & Local Stations

The average cable or satellite bill runs \$120-200 a month once the equipment rentals, broadcast fees, and sports surcharges pile on - and it climbs every year while paychecks stay the same.

IPTV changes the math. Your channels arrive over the internet you already pay for - same live TV, same remote in hand, delivered the modern way. No cable line, no dish, no rented boxes.

What your family gets:

- Over 10,000 HD channels - premium movies, sports, kids, news & international
- Your Memphis & Mid-South local stations stay right where you expect them
- No contracts, no equipment rental fees, no surprise increases
- Watch on any device - smart TV, Fire Stick, phone, tablet, laptop
- Sports & premium channels included, not stacked on as add-ons

Cutting the cord can put \$1,000 or more a year back in a working family's pocket - groceries, gas, school clothes, or breathing room at the end of the month.

Bradshaw Solutions sets you up the right way: honest advice on whether IPTV fits your home internet, full setup on the devices you already own, and one simple monthly price that beats the cable bill. Local, working-family service - the same fair-price promise behind every Bradshaw Solutions project.
